

# Riley Beenders

## NETWORK SECURITY | LINUX INFRASTRUCTURE | SYSTEMS AUTOMATION

Bethlehem, PA | [\(484\) 523-4431](tel:(484)523-4431) | [rileybeenders@gmail.com](mailto:rileybeenders@gmail.com) | [www.rileybeenders.com](http://www.rileybeenders.com) | [linkedin.com/in/riley-beenders](https://linkedin.com/in/riley-beenders)

### PROFESSIONAL SUMMARY

Network infrastructure and security-focused engineering leader with 10+ years of multidisciplinary experience and 5+ years spanning multi-site network deployment, internal IT infrastructure, self-hosted platforms, and software-integrated operations. Hands-on with Linux/Windows administration, firewall and VLAN routing, DNS, Kubernetes, Proxmox, Docker, Python, and Git; owns systems from architecture through deployment, troubleshooting, risk analysis, documentation, and cross-functional support.

### CORE EXPERTISE

**Networking & Security:** Network infrastructure; reverse-proxy and firewall routing; server networks and VLAN configuration; DNS and subdomains; domain-based application access; wireless deployments; remote operations and diagnostics

**Infrastructure & Platforms:** Linux/Windows systems administration; Kubernetes; Docker and containerized applications; Proxmox virtualization; virtual machines and containers; self-hosted infrastructure; resilient and redundant services

**Automation & Operations:** Python; Git/GitHub; workflow automation; data logging and monitoring; troubleshooting; software risk analysis; technical documentation; process standardization; stakeholder support

### PROFESSIONAL EXPERIENCE

#### Proteor / Proteor Printing Solutions | Coplay, PA

January 2025 - Present

##### Lead, Research & Development Engineer

- Lead the East Coast engineering team and collaborate across Proteor's global portfolio while continuing hands-on ownership of internal IT infrastructure, networked product systems, software standards, troubleshooting, and support.
- Lead ProteorPrint OS implementation and machine integration with an external software partner: a network-accessible remote operation and diagnostics platform with live video, AI-assisted alerts, and production metrics.
- Developed an automated LabVIEW/Modbus metrology system with private-VLAN connectivity, automatic communication, network observation, and remote-server report storage for traceable quality data.
- Performed and documented safety, operational, and software risk analysis for products and a cloud platform, implemented mitigations aligned with EU and U.S. requirements, and standardized internal software and processes.

#### Filament Innovations | Whitehall, PA

May 2020 - January 2025

Chief Technology Officer (Jan 2023 - Jan 2025) | Lead Electro-Mechanical Engineer (Jun 2022 - Jan 2023) | Industrial Engineer (Apr 2021 - Jun 2022) | Engineering Technician (May 2020 - Apr 2021)

- Progressed through four roles to CTO, directing technology strategy and internal IT infrastructure while remaining hands-on across software, firmware, controls, and manufacturing systems.
- Designed and hosted a redundant Kubernetes cluster running a self-developed ERP/CRM for orders, inventory, tasks, projects, and customer interactions, with dynamic BOM generation linked to purchasing.
- Integrated a modular multi-board CAN-bus architecture and independently testable electronics enclosures, simplifying wiring and debugging while enabling enclosure installation in minutes.
- Led automated systems from architecture and component selection through assembly, integration, testing, calibration, operator training, troubleshooting, and post-delivery technical support.

#### Northampton Area School District | Northampton, PA

June 2016 - August 2019

##### Computer / Network Technician

- Built network infrastructure and deployed 750+ wireless access points across six school buildings, supporting a distributed multi-site environment.
- Accelerated deployment of 2,500+ Chromebooks by developing an Arduino-based tool to automate setup-data entry and coordinated final distribution with administrators.

### EDUCATION & PROFESSIONAL DEVELOPMENT

#### Penn State University | B.S., Electro-Mechanical Engineering

December 2024

**Relevant development:** MathWorks Machine Learning, MATLAB, Simulink, and Simscape Onramps (2026); Lean Six Sigma Yellow Belt (2025)
